

Nanotechnology

Nanotechnology is science, engineering, and technology conducted at the nanoscale, which is about 1 to 100 nanometers. Nanoscience and nanotechnology are the study and application of extremely small things and can be used across all the other science fields, such as chemistry, biology, physics, materials science, and engineering¹.

To locate books on *Nanotechnology* inside Bibliotheca Alexandrina's Main Library, you may go to the B1 level and use the following call number:

Furthermore, the Bibliotheca Alexandrina offers a variety of subscribed electronic databases to meet your research needs. Subscribed databases are only available within the library premises, but you can freely email results to yourself.
