In this research we will publish and study three dirhams in the name of ‘Alī b. Muḥammad Ṣāhib Al-Zanaj (255-270 AH/869-883 CE), not published before, preserved in Forschungsstelle für Islamische Numismatik, in Tübingen University-Germany. The first dirham minted in ‘Askar Al-Imam, dated 258 AH, is the first example published in the world until now. The second dirham minted in Al-Madinah Al-Mukhtarrah dated 260 AH, is the first example published from this year. The third dirham minted in Al-Madinah Al-Mukhtarrah dated 266 AH, it is the first example published from this year too. In this research we will make a corpus for the coins of ‘Alī b. Muḥammad Ṣāhib Al-Zanaj which had been published earlier. We study the inscriptions and symbols found on these coins and explain it in light of the current events of this Revolution.
