KIT Development Policy & Practice

KIT Working Papers

KIT Working Papers cover topical issues in international development. The aim of the series is to share the results of KIT's action research in preliminary form with development practitioners, researchers and policy makers, and encourage discussion and input before final publication. We welcome your feedback.

UNFPA is proud to work with the Royal Tropical Institute to develop this material. We recognize that educational materials need to be updated with current information, so we invite users to provide feedback.

Table of contents

A. COST AND COST-EFFECTIVENESS ANALYSIS

Booklet A1: Cost and expenditure analysis

- Why analyse costs?
- Simple ways to analyse SRH costs
- Analysis 1 – Is expenditure following the budget?
- Analysis 2 – Are SRH priorities being met?
- Analysis 3 – Which facilities provide SRH services at the lowest cost?
- Analysis 4 – Which inputs cost the most?
- Analysis 5 – Which population group receives the most resources?
- Analysis 6 – How reliable are the sources of financing for an SRH service?

Booklet A2: Determining the costs of SRH programmes

- A Step-By-Step Approach to Costing

Booklet A3: Cost-effectiveness analysis

- Why perform a cost-effectiveness analysis?
- How to perform a cost-effectiveness analysis

B. ECONOMIC APPROACHES TO PRIORITY SETTING

Booklet B1: Using economic analysis to justify public intervention for SRH

- Economic justifications for public intervention in SRH (market failures)
- An introduction to priority setting
- Priority setting on the basis of burden of disease
- Priority setting on the basis of cost-effectiveness analysis

Booklet B.2: Economic approaches to equity

- What is equity in relation to health?
- Equity/efficiency trade-offs
- Ways to measure equity
- Resource allocation to improve equity

Booklet B.3 The economic impact of sexual and reproductive health

- What is economic impact?
- Economic impact of sexual and reproductive health
- Example: Economic impact of AIDS
- Potential problems with using economic models

C. FINANCING SEXUAL AND REPRODUCTIVE HEALTH SERVICES

Booklet C1: Estimating what is spent on sexual and reproductive health

- What is a health expenditure review?
- Assessing public expenditure on sexual and reproductive health
- Assessing private-sector expenditure and total expenditure on SRH
- National Health Accounting

Booklet C.2: Estimating future financial resource needs

- Why estimate future resource needs?
- Different ways of estimating future resource needs
- How to estimate future resource needs

Booklet C3: Financing sexual and reproductive health

- Objectives of health care financing
- Main types of health financing
