## Hard to Recycle Items

There are many non-traditional items that can be recycled in Boulder County. Eco-Cycle, a local non-profit agency in Boulder County, provides a list of resources for Hard to Recycle items.

To find out where to recycle the following items and other hard to recycle materials, consult [Eco-Cycle's A-Z Recycling Guide](#). A search box appears in the top right corner of each page. Or visit [CHaRM](#) (Center of Hard to Recycle Materials) more information about the facility.

- Air Conditioners
- Aluminum Cans and Foil
- Ammunition/Explosives
- Antifreeze
- Appliances
- Art and Hobby Items
- Asphalt
- Backpacks
- Barrels/Drums/Tanks
- Bathtubs
- Batteries - All
- Batteries - Car
- Batteries - Rechargeable
- Batteries - Silver Oxide and Button
- Bicycles
- Bicycle Inner Tubes & Tires
- Binoculars and Spotting Scopes
- Books
- Box Springs

The Recycling Process

Retail Partnership

## SDAB in English

In 1994, the Swedish tyre industry set up Svensk Däckåtervinning AB, SDAB (the Swedish Tyre Recycling Organisation). The first task of this new company was to participate in the process that led to the Directive concerning manufacturers' liability for tyres (1994:1236). This liability means that whichever company places goods on the market must also accept liability for how they are dealt with at the end of their service lives.

SDAB represents the tyre industry vis-à-vis the authorities and is responsible for organising the collection and recycling of all used tyres. The company is run as a non-profit organisation and is owned by DFTF (the tradeorganization for tyre-, rim- & equipmentsuppliers) and DRF (The Swedish National Association of Tyre Specialists) which includes the retreading section, RS. The Board consists of five members - three from DF and two from DRF. Consumers accept their environmental responsibility by paying a special recycling charge when they purchase new tyres.

How Tyres Are Recycled

Products And Applications

Associates & Industries

## Welcome to SA Tyre Recyclers

SA Tyre Recyclers was formed in late 2005 in order to establish South Africa's newest and most up to date tyre recycling facility at Atlantis, Cape Town, SA.

As well as operating the most modern tyre recycling facility in South Africa, SA Tyre Recyclers works closely with local authorities and government bodies looking at recycling issues and environmental matters regarding post-consumer tyres.

The recycling capacity of the SA Tyre Recyclers plant is around 10,000 tonnes per annum which means around 1 million tyres of mixed sizes and types. With millions
